

NEXT COMPUTING

OEM or End-User System Personalization Lets You Create a Solution and Make it Your Own

The extreme-performance mobile computing products from NextComputing are available for OEM and small- to large-volume personalization opportunities.

NextComputing offers:

- **Private labeling on systems and accessories:** Company logos can be silk-screened on a chassis or stitched on carrying bags. Personalize systems in batches of 10 or more. Put your name on the highest-performance mobile server/workstation on the market.
- **Revision/configuration management:** Track, update, and ensure compatibility of your custom product through the NextComputing support system.
- **Integration of proprietary hardware/software:** In addition to commercial off-the-shelf products, NextComputing systems support custom PCI boards, I-O modules, and application loads.
- **Datasheets and co-marketing services:** Brand existing collateral with your identity, or create new material with high-resolution graphic elements.
- **Customized documentation:** Personalize or modify system documentation to focus on new components or company procedures.
- **Customized products based on our FleXtreme architecture:** Put NextComputing's flexible, expandable system architecture to work for you. Create personalized configurations and bundles. Explore new form factors to fit your needs.
