- ⇒ Enhance productivity and streamline workflow efficiency
- ⇒ Download the largest studies in a fraction of the time
- ⇒ Reduce report turnaround time
- ⇒ Perform more reads, submit more reports
- ⇒ Increase bottom line profitability

Are you a high-volume diagnostic radiologist looking to enhance productivity?

If so, then NextComputing has a customizable, high-performance system to meet your needs. The TravelRad is a small, lightweight workstation designed to enable radiologists to read and interpret studies of any size from any location.

- Interpret CT, MRI, Ultrasound, Nuclear Medicine studies, and offer preliminary interpretations of plain film radiography from anywhere
- Experience high-end processing and graphics performance unlike any laptop
- Configure with up to three 2MP displays
- Simultaneously run voice recognition and PACS software from the same machine
- Leverage TravelRad's support for high-speed 4G connectivity
- Choose from a wide array of storage options, including Solid State Drives from Intel®
- Reduce total cost of ownership with this completely upgradeable system

Processor Options

- Six-Core Intel® Core™ i7
- Quad-Core Intel® Xeon™

Memory

- Up to 24GB RAM

Storage

- (2) removable Solid State drives, up to 600GB each
- Up to (6) internal fixed Solid State drives, up to 600GB each
- High-capacity SATA or SAS drives also available

Optical Drive

Internal DVD ± RW

Display & Graphics

- Integrated 17" LCD (1920x1200 resolution)
- Professional graphics from AMD and NVIDIA
- Portable clip-on displays—Up to (2) additional portrait-oriented 2MP (1200x1920 resolution) displays

Physical

- System dimensions: 5.55" (D) x 12.40" (H) x 16.75" (W). Weight: ~18 lbs.
- Clip-on display dimensions: 1" (D) x 10.75" (H) x 15.5" (W). Weight: 4 lbs.

I/O

- Up to (8) USB 2.0 ports
- Up to (2) USB 3.0 ports
- (1) IEEE 1394a (FireWire 400)
- (1) Gigabit-Ethernet port
- (6) analog audio ports (audio line-in / line-out / mic-in)

Operating System (32- or 64-bit)

- Microsoft Windows 2008 Server
- Microsoft Windows XP Professional
- Microsoft Windows Vista Business (64-bit only)
- Microsoft Windows 7
- Dual-boot options

Includes

- Logitech USB Mouse
- Kensington SlimType USB keyboard
- 1 year manufacturer's return-to-factory warranty

Options

- Rolling soft or hard cases
- Extended warranty

Need More?

The TravelRad is available in other form factors with support for additional features such as:

- Dual processors
- Up to 48GB RAM

Contact a NextComputing sales engineer to find out how the TravelRad can be configured to run your most demanding applications.
